Professional Summary

Motivated Computer Science Engineering fresher with hands-on training and project experience in **Java**, **Spring Boot**, and modern frontend technologies. Delivered **3+ full-stack projects** involving **RESTful APIs** and relational database integration. Quick learner with strong problem-solving ability, focused on writing clean, maintainable code and delivering end-to-end solutions across the software development lifecycle.

Skills

Programming: Java, SQL, JavaScript (ES6+)

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: Spring Boot, Spring Data JPA, Hibernate, RESTful APIs, Servlets, JSP

Database: MySQL, JDBC, SQL Query Optimization

Core: OOPs, Collections, Data Structures, MVC Architecture, CRUD Operations, SDLC, Exception Handling

Tools & Platforms: Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse IDE, VS Code, Apache Tomcat

Projects

LifeFlow – Blood Bank Management System

2026

Java 21, Spring Boot, MySQL, REST API

- Built a full-stack web application with **22 source files** and **20+ RESTful API endpoints** managing donor records, blood inventory across **8 blood groups**, and patient blood request workflows.
- Developed an emergency-priority request workflow (Normal / Urgent / Emergency) with approve, fulfill, and reject transitions; fulfillment automatically deducts blood units with stock validation.
- Designed a responsive SPA using pure HTML/CSS/JS with a dark-themed dashboard, modal forms, toast notifications, real-time low-stock alerts, and filter/search across modules.
- Configured JAR deployment for Eclipse and Apache Tomcat 10.1 by extending **SpringBootServletInitializer**.

Ecommerce Management System

2025

Spring Boot, REST API, MySQL, Postman

- Developed a Spring Boot backend implementing full **CRUD operations** for Product and Customer management through RESTful APIs.
- Integrated **Spring Data JPA** with MySQL for efficient data persistence and validated **15+ API endpoints** using Postman.
- Designed a layered architecture with Controller, Service, and Repository modules, improving maintainability, scalability, and reusability.

Interactive Portfolio

2026

HTML5, CSS3, JavaScript (ES6+), React

- Designed and deployed a premium single-page developer portfolio showcasing full-stack projects, technical expertise, and career milestones across devices.
- Engineered a custom physics-based particles background using the **HTML5 Canvas API** and vanilla JavaScript with dynamic theme adaptation and particle-node connections.
- Constructed an interactive contact form with client-side validation, floating-label states, and animated loading/success feedback.

Experience

Pentagon Space, Vijayanagar

2026

Java Full Stack Development – Training

- Completed **500+ hours** of training in Core Java, JDBC, Servlets, SDLC, Spring Boot, Smoke Testing, and MySQL.
- Built **3+ real-time full-stack projects** and gained hands-on exposure to Git, Agile workflows, and API testing with Postman.

Achievements

- District-level Kho Kho Player, representing the district at the sports meet.
- Won district-level speech/elocution competitions **3 times**, demonstrating strong public speaking and communication skills.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering
2022–2026
Government Engineering College, Huvina Hadagali – VTU
CGPA: 8.99
